

ExpressoVote™

by Nordis Technologies

Created especially for HOAs, ExpressoVote lets you quickly and easily customize the voting process to comply with the specific requirements of each property. It easily handles online voting, mailed-in ballots and in-person voting at annual meetings, offering online and hard-copy tabulation and real-time reporting and election certification. ExpressoVote is secure, with a proven process for authenticating each owner and keeping votes confidential.

- With our simple-to-use yet powerful **Expresso** application, you can create, change, approve, produce, and distribute print and electronic statements, invoices and other consumer correspondence in just minutes.
- Improve customer service with **ExpressoArchive**, which gives you real-time access to previously delivered customer communications in the cloud.
- Simplify vendor management for your print communications with Nordis Print & Mail services, including variable print on demand, full-color digital printing and data processing.
- Go digital and deliver communications based on your customer's preferred channel, and leverage existing touch points to drive higher customer opt-in rates while saving on print and postage.

Build a Better Election Process

Simplify governance

Combine election communications and voting to manage the entire election process from a single dashboard.

Increase efficiency and control

Move to an automated process. Establish business rules to run your elections and easily develop and distribute customized ballots and other materials for each HOA.

Improve election participation

Monitor results 24/7 to ensure quorum is met and send follow-up mail or email communications to improve owner participation.

Increase digital engagement and owner choice

Offer options for easy and fast online and offline voting and communications, improving customer service and voter response.

Save time and money

Reduce print and mail costs with an opt-in process for email. Online tabulation eliminates return postage and manual handling costs and speeds results.

Key features

Integrated platform

Single dashboard for managing election communications, voting and results reporting.

Turnkey solution

Document creation to electronic and print production and distribution, plus online and offline vote management, tabulation, results reporting and certification.

Powerful user tools

Create and manage documents, content library with text, images, and logos, business rules and more. Monitor results and generate reports 24/7/365.

Configurable and flexible

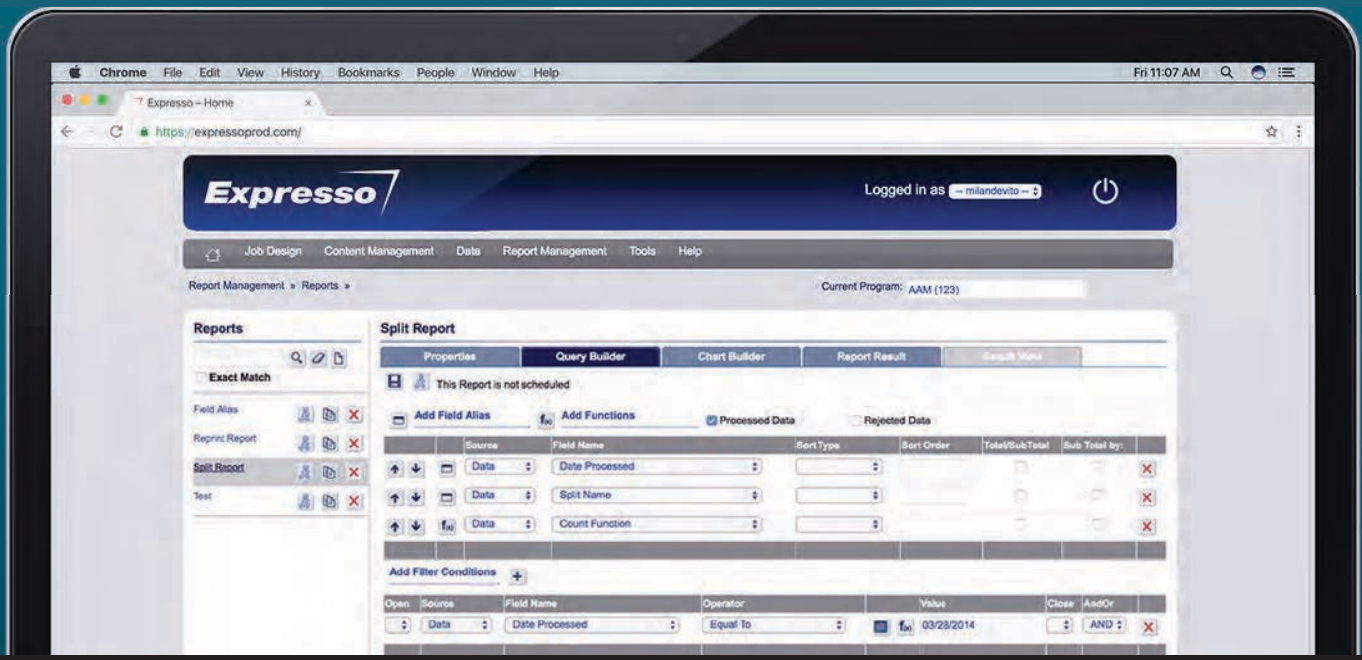

Set parameters from login credential to rules for voiding votes, plus owner ability to revoke votes.

Secure application

Assign unique set of log-in credentials to each owner and specific URL for each HOA.

Third-party certification and authentication

Independent authority to validate process and results, including dual entry/verification for all hard copy votes

Optimize and Automate

As a leader in solving complex communications challenges with pace-setting technology, we have developed a full-service solution for critical, recurring financial-related communications.

End-to End Solution

Critical communications management and payments, plus print and mail production and distribution services, from a single dashboard

Cloud-based Platform

Scalable with 24/7/365 access

Powerful User Tools

Manage templates, content, documents, mailing packages, emails, reports and much more

Expresso Product Suite

Seamless integration of important capabilities such as ExpressoArchive

Advanced Integration

Multiple data file formats and production requirements streamlined into one automated workflow

Intelligent File Processing

Incoming batch file processing and automated return file results to client or designated third parties, including automated NCOA and CASS

Secure Production Facilities

Locations in Coral Springs, FL and Las Vegas, NV
